

SANITARY NO. 2.

How do the minute organisms that cause typhoid fever and other kindred diseases, get into the human body? Bred in cess pools and other places where filth collects, what road do they take to the insides? A most important question, and happily, how well answered. Water is the usual channel. The foul matters percolate through the closest soils, and enter wells, and other sources of water supply, and are drunk or introduced through some form of food. We will relate a few instances that are well known to all decently read medical men. Three years ago, one of the most aristocratic districts of London was suddenly the scene of a wide spread outbreak of typhoid fever. The family of a prominent physician was among the victims. The disease appeared suddenly in several houses, and spread with great rapidity. An immediate and thorough investigation into the condition of the sewers and water supply was had, and nothing found. Finally the physician thought of the milk that was furnished the district. It was found that the milk used in every house where there was typhoid fever, came from a certain dairy, and on examining this milk farm, it was found further that the cows were well cared for, had none but first quality of food, and the water given them was pure, but the water used to wash the various utensils in use, and the cans in which the milk was sent to London, was taken from a small brook; it was found that an old, and unknown sewer ran near it in one place, and this sewer had leaked into the brook. The cause of more than sixty cases of typhoid fever, eleven of which were fatal, was thus discovered. The disease had been caused in the milk, and that was contaminated by the water used to wash the cans. Prince Albert was killed by sewer gas that came into his room through a crack in the wall, and this crack communicated with an old sewer that had been forgotten, and unused for years. Within five years the Royal families of Europe, have buried six of their number from sewer gas poisoning. Water may be as clear as crystal and be perfectly clean to the taste, yet badly polluted. No amount of filtering will make water that is sewer poisoned, fit for use; the organisms that carry the disease, are too minute to be filtered out of any cess pool or sink for dish water. The water from a well may remain pure for some years, but the time will come when the foul matters will percolate through fifty or even a hundred feet of soil, and scatter death to all who drink or use the water. There are at least one hundred wells in the town of Reno, the water from which never should be used. We know of a well that has within twenty five feet of it, five privy vaults, used and covered up. There is not a well within the thickly settled part of the town, that ought not to be filled up. They may not be poisoned now, but the day will soon come when they will add their victims to the long list that has gone before. Just now San Francisco is alarmed at the terrible death rate, and the imperfect sewerage is the cause of it all. Situated as Reno is, at the base of a high mountain range, swept daily by fierce winds, with a river of the very best water running through the town, it is a downright crime for us to have among us typhoid fever, diphtheria and scarlatina or any disease that is caused by sewer poison. In our next we will give some direction for disposing of sewerage.

IT HAPPENED AGAIN.

Somebody evidently well posted, is writing up a history of the California Democracy for the Sacramento Bee. We find things old and new brought to light and we believe the letters will do California good by showing how one great political party has been run. In Tuesday's letter we find this sentence: "Still Mr. Bishop contended that Mr. Flood, because of his wealth and in spite of his doubtful Democracy," was the man above all others for the place." That sounds very much like what we understood was said to some of the Nevada Democracy when they kicked about Uncle Jimmy, he might not be much of a Democrat, but he had duets and that's what was needed. Its awful handy to have a rich man at the head of the ticket to pull the impetuous tail pieces through.

Articles of incorporation were filed Wednesday afternoon of the first cremation society of San Francisco. The object of the association is the erection and maintenance of a hall to cremate the dead, and, by actual trial, to seek to popularize cremation and hasten its universal adoption. There is no capital stock. The promoters are mainly Germans.

NEWS OF THE MORNING.

It is reported in New York that the Union Pacific Company has signified its willingness to consolidate with the Central Pacific on a basis of 125 to 100. It is intimated that both the Central and Union Pacific are being manipulated to bring about a satisfactory basis for consolidation.

The New York Herald's Washington special says: Notice has been received here at the Mexican and other legations that on the 14th of January Guatemala offered a treaty to Mexico, which will be accepted, freely ceding to Mexico the section of country about which there has been a boundary dispute, and agreeing to establish the boundary according to the claims of Mexico. This is rather a comical ending to Blaine's proposed intervention in favor of Guatemala, which he sought to justify on grounds which the Mexican Secretary of State, it will be remembered, showed him to be untenable, for the reason that Blaine had omitted to inform himself of the history and facts of the dispute.

The Senate yesterday afternoon took up the Anti-polygamy bill (to amend Section 5,342 of the Revised Statutes in reference to bigamy, and for other purposes,) and the amendments proposed by the Committee on Judiciary were read and agreed to up to the fifth section, which authorizes the President to grant amnesty to classes of offenders guilty, before the passage of the Act, of bigamy, polygamy or unlawful cohabitation, on such conditions as he shall think proper. A debate upon this followed, but it was adopted. Other amendments were discussed, when the session closed, with the understanding that the measure should be proceeded with at once after the morning business to-day.

Snowden, of the Philadelphia Mint, was before the House Committee on Coinage yesterday in reference to the extension of that Mint, and in the course of the discussion upon coinage generally he recommended that, instead of establishing branch mints, superintendents of assay offices be authorized to issue bullion certificates for bullion deposited there. His recommendation was that superintendents of assay offices be compelled to receive both gold and silver bullion on deposit and issue to depositors' certificates in amounts of \$10 and upwards therefor, payable to bearer, and that these certificates shall at once enter into the general circulation of the country. Snowden said this would be much cheaper than to establish branch mints and would serve substantially the same purpose. This suggestion met with decided favor in the minds of the committee. Snowden was asked if he did not think the issuance of these certificates would tend to bring silver up to par with gold, and he replied in the affirmative. The committee will give this subject due attention.

BLAINE AND SOUTH AMERICA.

There is always two sides to every story. The past life of Mr. Blaine has been so full of brilliant achievements, and has shown so much hard sense that we are very slow to believe that he has blundered in any important matter. The Baltimore American, one of the oldest and best of our Republican journals, says:

Deep down in the hearts of the American people is rooted a sentiment utterly repugnant to the consummation of this gross injustice in South America, and Mr. Blaine will not have long to wait for triumphal vindication. The policy outlined by him is not only favorable to the commercial interests of this country, which are decidedly on the wane in that direction, but it is broad, equitable, and in consonance with the genius of American statesmanship since the foundation of the Government. If there were no other argument in its favor, the fact that an ambitious republic like Chili, saturated with European and especially English ideas, backed by English capital, and, by the force of circumstances, arrayed in an unfriendly attitude to the United States, is about to obtain a vast expanse of territory, by means of which she will control the whole western coast of South America, is sufficient ground for very decided interference, and a protest which would carry with it the weight of a command. Had Mr. Blaine been suffered to carry out his policy, there is not the slightest probability that a war would have resulted; but the integrity of Peruvian territory would have been maintained, and the United States, in any contingency that might arise, would have had an ally bound by the ties both of gratitude and self-interest.

Why is This Thus?

"San Bernardino county oranges, says the Index, are now bringing from \$40 to \$50 per 1,000, while we notice oranges from other localities only bring from \$25 to \$30." Yes, and oranges are worth five cents each in Reno. We bought a few dozen nice oranges once in San Francisco for two bits a dozen, brought them home and found that we had got them for less than they cost Reno dealers by the box. Trade in Nevada is a curious medley.

There were \$68,000 postage stamps sold by the general postoffice in New York City on St. Valentine's Day.

SANITARY.

The farmers are boring a great number of artesian wells near Santa Ana. The stock and crop outlook in Mendocino county is better this year than last.

In a pigeon shooting match at Liverpool Monday, 100 birds for £100 a side. Dr. Carver 31 yards, Graham 29 yards, and Fowler (the Scotch champion) 28 yards, Dr. Carver won easily.

Mormonism is advancing into Arizona. Some of its most valuable land has been taken up by them and large herds of cattle placed upon the valleys of the San Francisco mountains.

The Portland Board of Trade has passed a resolution earnestly asking the Senators and Representatives of Oregon to use their best efforts to prevent the forfeiture of the Northern Pacific land grant.

A Baltimore doctor says that women who wear high-heeled shoes destroy the shape of their calves. There! We'll bet you the girls won't appear in high-heeled shoes and be open to an unpleasant suspicion.

In the beginning of this century the evangelical churches of the country had 364,872 members; in 1850 they had 3,143,408; in 1870, 7,308,824; in 1880, 10,065,963. This don't look very much like dying out.

Chinamen are being dumped into California at the rate of 1200 a week, and Congress is doing nothing to prevent their coming. Do hurry up the Page bill before the leather colored heathen crowd us all out.

Defalcations to the amount of \$47,000,000, have been discovered in the Russian Customs Departments. It looks to the Chicago Tribune fiend as though some Russian officials had been going to the Patti concerts.

Gen. Tom Thumb's measure at a clothing store recently for twelve suits of wool underwear, to be made by the American Hosiery Company, in Hartford, Conn. He takes the same measure as a child six years old.

An old lady who had no relish for modern church music, was expressing her dislike of the singing of an anthem in a certain church not very far from —, when a neighbor said, "Why, that is a very old anthem; David sang it to Saul." To this the old lady replied, "Weel, weel, I noo for the first time understand why Saul threw his javelin at David when the lad sang for him."

Women on Horseback.

[San Jose Mercury.]

A lady was thrown from a horse in Oakland the other day and killed. It is a wonder more are not killed. There is only one safe and easy way to ride a horse, and that is astride. We wish the intelligent and cultured women of California had independence enough to ride in this way. With their present cumbersome riding habits to entangle their legs, the chances of serious accidents are greatly increased. They should ride a horse properly or keep off the animal's back.

The Mercury is right. It is a defiance of the laws of gravity for ladies to ride on side saddles. The most expert, dashing and graceful female riders in the world are the Hawaiian women, and they all straddle their horses. If there was nothing else to condemn the side saddle but the discomfort of the rider, that ought to be sufficient to abolish it. But the strained position of the lady who rides on the starboard side of a horse, brings on spinal disease, and in the event of a sudden baulk or a runaway she is almost sure to meet with a serious accident. We hope to see the time when ladies will sit on their horses in a manner to not violate the laws of nature, and thus secure comfort as well as safety in their equestrian exercises. —Los Angeles Express.

The Virginia Chronicle finds itself as the sole apologist for the late brutal fight between a couple of two legged brutes, but offers as an excuse for its disgraceful position that an Emperor of Russia once witnessed a prize fight in England and shook hands with the victor. We believe we have heard of this Emperor before; think he is the man that kept a dozen mistresses and disgusted the whole of Europe by his drunkenness and brutality. He was just the kind of man we should expect to find around a prize fight.

In Orange, Los Angeles county, Cal., Wednesday, Fred. Reuter, a prominent citizen of Santa Ana, was shot and killed by Thomas Holz, with whom he had clinched in a fight. There was an old grudge.

AYER'S SARSAPARILLA,

For Purifying the Blood.

This compound of the vegetable alterative, Sarsaparilla, Dock, Stillinger, and Mandrake with the Iodides of Potash and Iron, makes a most effective cure of a series of complaints which are very prevalent and afflicting. It purifies the blood, purges out the lurking humors in the system, thus un dermine health and settle into troublesome disorders. Eruptions on the skin are the appearance on the surface of humors that should be expelled from the blood. Internal derangements are the determination of these same humors to some internal organ or organs, whose action they derange, and whose substance they disease and destroy. AYER'S SARSAPARILLA expels these humors from the blood. When they are gone the disorders they produce disappear, such as Ulceration of the Liver, Stomach, Kidneys, Lungs, Eruptions and Eruptive diseases of the Skin, St. Anthony's Fire, Rose or Erysipelas, Tingles, Pustules, Blisters, Boils, Tumors, Tetter and Salt Rheum, Scald Head, Ring-worm, Ulcers and Sores, Rheumatism, Neuralgia, Pain in the Bones, Side and Head, Female Weakness, Sterility, Leucorrhoea arising from internal ulceration and uterine diseases, Dropsy, Dyspepsia, Emaciation and General Debility. With their departure health returns.

AYER'S CATHARTIC PILLS

FOR ALL THE PURPOSES OF A FAMILY PHYSIC, CURING

Costiveness, Jaundice, Dyspepsia, Indigestion, Diarrhoea, Foul Stomach and Breath, Headache, Erysipelas, Piles, Rheumatism, Eruptions and Skin Diseases, Biliousness, Liver Complaint, Dropsy, Tetter, Tumors and Salt Rheum, Worms, Gout, Neuralgia, as a Dinner Pill, and purifying the blood, are the most congenial purgative ever perfected. Their effects abundantly show how much they excel all other Pills. They are safe and pleasant to take, but powerful to cure. They purge out the foul humors of the blood; they stimulate the sluggish or disordered organs into action; and they impart health and tone to the whole being. They cure not only the every day complaints of everybody, but formidable and dangerous diseases. Most skillful physicians, most eminent clergymen, and our best citizens, send certificates of cures performed, and of great benefits derived from these Pills. They are the safest and best physic for children, because mild as well as effectual. Being sugar coated, they are easy to take; and being purely vegetable, they are entirely harmless.
